**MEKELLE UNIVERSITY****MEKELLE INSTITUTE OF TECHNOLOGY****Department of Computer Science and Engineering***Ref: MCT/170 D/
Dec 26-6-2025/25***VISION STATEMENT**

Become a Center of Excellence in Engineering, Science, and Technology education and R&D, thus enhancing the realization of science and technology-led national development.

MISSION STATEMENT

Offer high quality education, undertake advanced R&D programs, and deliver dependable community services in engineering, science, and technology.

GOAL STATEMENT

Produce highly qualified professionals in engineering, science, and technology who can invent and innovate, apply research, and build their own careers, thus contributing towards the development of Ethiopia and the transformation of Ethiopians to a self-reliant and vibrant society.

VALUE STATEMENT

MIT values innovation and creativity in response to development needs of Ethiopian society.

To Whom It May Concern,

It is my pleasure to recommend Mr. Miebale Nigus Asefa, a graduating student in our 5-year Computer Science and Engineering program at Mekelle Institute of Technology. During the past year as a Head of Department, I have observed Miebale's consistent dedication, innovation, and leadership in both academic and real-world settings.

Miebale is a driven and capable individual with a strong foundation in software engineering and full-stack development. He currently serves as Full Stack Developer at **Teleport Technologies** and previously interned at **Ethiopia's Vite Technologies Pvt Ltd**, where he contributed to building scalable and user-centric web applications, advancing digital transformation in the SaaS industry.

His work reflects both technical proficiency and a deep sense of purpose. He has developed systems that enhance hospital operations and improved patient service delivery through data-driven automation.

Beyond his technical expertise, Miebale is dependable, collaborative, and highly motivated. He mentors his peers, actively contributes to group projects, and consistently seeks opportunities to apply his skills for the greater good of his community and profession.

I wholeheartedly recommend Miebale Nigus Asefa without reservation for any scholarship, research, or academic opportunity. He has my full confidence and support.

Sincerely,

G/selama Gebreyohans (PhD),

Dean of Mekelle Institute of Technology
